PROFESSIONAL SUMMARY

Innovative Software Developer with 2+ years of experience in full-stack development specializing in .**NET MVC, .net core, Angular TS, front-end development and some development tools** with a strong foundation in **software architecture and design**. Passionate about staying Up to date with emerging technologies and collaborating with cross-functional teams to deliver cutting edge products and solutions.

EDUCATION

Bachelor of Technology
Computer Science and Engineering (2021).
Islamic University of Science and Technology **Awantipora, J&K**

TECHNICAL SKILLS

- Programming languages: C#, JavaScript
- Frameworks: ASP.NET Core, ADO.NET, Entity framework, ASP.NET MVC ,ASP.NET Web Forms, Telerik UI
- Front-End Technologies: HTML/CSS, JavaScript, Angular TS, jQuery, Ajax
- Development Tools: Visual Studio Code, Visual Studio 2022, POSTMAN, Crystal Report Databases: Ms SQL Server
- LINQ
- Git
- API Development
- Mobile Responsive Design
- Technical Documentation
- Troubleshooting & Debugging

SOFT SKILLS

- Analytical thinking
- Creativity ability to manage
- Mathematical Aptitude
- Strong Communication skills
- Adaptability
- Teamwork

- Be able to work independently

WORK EXPERIENCE

Revenue Technology Services (RTS) **(Sep 2024 – present)**

Software engineering

- Set up and configured the latest code solution from the DevOps repository on local systems, ensuring proper GIT integration with Visual Studio for seamless development workflows.
- Developed an ASP.NET Web Forms page and wrote corresponding stored procedures to support page functionality and data operations.
- Gained expertise in the Data Automation Scheduler Jobs application code and its related database stored procedures (SPs).
- Performed smoke testing to ensure basic functionality of applications post-deployment.
- Conducted unit testing to validate individual components and modules for quality and reliability.
- Addressed and resolved bugs, providing ongoing support and ensuring the stability of the system.
- Participated in smoke testing on the UAT environment and verified PBI changes to ensure alignment with project requirements.
- Engaged in technical discussions and conducted knowledge transfer (KT) sessions to enhance team collaboration and knowledge sharing.
- Installed and configured Visual Studio 2022 with GIT Copilot, utilizing its features for accelerated coding and quick code suggestions, improving overall development efficiency.
- Contributed to the Tariff Rate Loose Module by understanding UI, upload, override, and quarantine stored procedures and business logic, ensuring accurate implementation and system functionality.
- Enhanced backend functionality by removing inactive user filters, enabling the system to retrieve and display records from both active and inactive users on the UI and API level.

- Refactored and optimized .NET (C#) services and data access layers to ensure accurate and consistent record retrieval across the application.

- Collaborated with the QA and product teams to validate changes and resolve related bugs and work items assigned via Azure DevOps.

- Ensured data integrity and performance through SQL query updates and validation across affected modules.
- Worked under an Azure DevOps-based workflow, managing tasks and bug fixes via work items and sprint boards.

- Created comprehensive technical and functional documentation for key air cargo system modules
- Proficient in creating Database Diagrams using SSMS

Web Kraft IT Solutions **(Mar 2023 – Aug 2024)**
Software developer

- Assisting the development manager with all aspects of software design and coding.
- Created a fully dynamic visitor form which draws the required fields directly from the database display it according to the order and column section from database and having multiple tabs and language switch options.
- Responsible for creating the CRUD operation in ERP software including t PDF generation and design.
- Designed client-side and server-side architecture.
- Build features and applications with a mobile responsive design.
- Wrote technical documentation.

Sancy Berhad **(Mar 2022 - Feb 2023)**
Software developer

- Work with development teams and product managers to provide software solutions.
- Worked on lab and hospital project using serenity framework and MS SQL server, HTML 5, .Net, JavaScript,
- Attending and contributing to company development meetings. Learning the code base and improved coding skills.
- Monitoring the technical performance of internal systems. Responding to requests from the development team.
- Wrote and maintained code. Worked on minor bug fixes.

PROJECTS

Text Summarization (Mar 20-Sep 20): Fine-tuned BERT for text summarization, Achieving a stateofthe-art ROUGE-L score of 43.4 on CNN daily mail dataset.

CERTIFICATIONS

- **Web Development (**Coursera, Hopkins University, Apr 2021**)**
- **Web Development Intern (**Infowiz Software Solutions, Jan 2019- Feb 2019**)** • **Certified C# Basic** (Cutshort, May 2023)
